

	<h2>HSEQ policy</h2>	Document no:	03-01
		Revision:	01
		Valid from:	26-10-2023
		Approved by:	CA/SL

Task Engineering want to be the preferred supplier of project management and delivery of specialized resources for the on- and off-shore renewable wind and marine industry.

Task Engineering will deliver competent and relevant services of high standard and ongoing adapt our services to our customers' requirements. We are serious, proactive and committed, and we pay close attention to quality and responsibility in all our activities.

Our services are performed with great attention to health and safety and the current legislation. We follow our customers guidelines and contributes proactively to ensuring compliance with applicable QHSE standards and regulations at the current workplace.

Using risk-based thinking, we will continuously assess health, safety and the impact of our activities on the environment in order to achieve the best possible minimization of HSE risks.

**Task Engineering will therefore:**

- deliver service of high and uniform quality
- maintain good and trust-inspiring communication with all our stakeholders
- strive to understand our customers' needs and meet their requirements and aim for great customer satisfaction
- promote a work culture that achieves our business objectives through safe behavior, environmental and quality awareness
- ensure that all personnel and contractors have the necessary information, training and supervision to meet regulatory, customer and other business requirements
- create safe and healthy working conditions, both psychologically and physically, to prevent work-related injury and illness
- prevent pollution and minimize any adverse effects our operations may have on the environment
- ensure that contractors are delivering according to Task Engineering's code of conduct
- ensure the consultation and participation of personnel and their representatives
- establish, develop and review measurable objectives that promote continuous improvement of our quality, health & safety and environmental performance and to strive for zero harm to people and the environment and zero defects
- ensure this QHSE policy is actively communicated and made available to all personnel and other interested parties
- Ensure this QHSE policy is periodically reviewed so that it remains relevant and appropriate
- Continue maintaining and improving our management system according to DS/EN ISO 9001, DS/EN ISO 14001 and DS/EN ISO45001, this is to ensure it complies with any legal requirements, customer requirements or own requirements which supports delivering to the highest standard and according to our customers' expectations
